

Astronomy Club Event ASTROPHOTOGRAPHY

“To confine our attention to terrestrial matters would be to limit the human spirit.”

Dear Parents / Students

The Astronomy Club of our school offers opportunities to the students in understanding the celestial bodies, their origin and changes along with the role of science in exploration and understanding the universe. To imbibe the same awareness among children, **BPSG** is coming up with an astronomy club event named “**Astrophotography**” on **11th October, 2023 (Wednesday)**. Through this club event, we hope to impart ability to analyse and interpret quantitative observations of celestial objects & increase a sense of excitement and wonder amongst the students.

Each participant has to submit a space-themed image and brief presentation categorised as –

- **Class III – V:** Moon captured by Chandrayan – 3 and demonstration of DIY Rocket
- **Class VI – VII:** Seasons Origami
- **Class VIII – XI:** Compare and Contrast: Moon and Earth

General Instructions:

- Students will bring their materials required for activity themselves as per their need.
- The event is scheduled on **11th October 2023 (Wednesday) from 8:15am – 8:45am**
- The school encourage all Astronomy Club students to actively participate in "Astrophotography" event

Thank you for your cooperation.

With Best Regards
BPSG
