

Session: 2023-24

## Report on Raksha Bandhan Celebration

On August 29, 2023, Birla Public School Gangaganagar celebrated Raksha Bandhan in a unique and environmentally conscious way under the theme "Protection of Our Mother Earth." This innovative event aimed to emphasize the importance of safeguarding our environment while simultaneously honouring the traditional festival of Raksha Bandhan. By amalgamating the core elements of Raksha Bandhan with eco-friendly activities such as Rakhi making, plant watering, animal feeding, and visiting orphanages, the event effectively conveyed the message that, just as we protect our relationships, we must also protect our mother earth. The event effectively conveyed the message that just as we protect our relationships through the sacred thread of Rakhi, we must extend that protective instinct to our mother earth. It illustrated that our actions, no matter how small, can have a significant impact on the environment. By combining tradition with environmental consciousness, the event inspired a sense of responsibility and stewardship among the participants. The celebration was a heartwarming blend of tradition and environmental consciousness. It showcased that even the youngest members of society can play a significant role in the mission to protect our mother earth. By embracing eco-friendly practices and spreading awareness, the event left an indelible mark on the minds of the students, encouraging them to become responsible custodians of our planet. This celebration serves as a shining example of how traditional festivals can be adapted to promote positive social and environmental values.
