**EVS Event - Water Wisdom**

**Day & Date:** December 17, 2025 (Wednesday)

**Event Name:** Water Wisdom

**Total No. of Students:** (III A- 28, III B 27= 55)

**No. of Participants:** 15

## **Event Highlights:**

- Students enthusiastically participated in discussions and demonstrations about the water cycle, solute-solvent concepts, and the importance of water.

The classroom was transformed into a creative science space with charts, models, and interactive displays.

Learners explained processes like evaporation, condensation, and precipitation using self-made models.

Students prepared colourful charts highlighting water conservation methods and the role of water in daily life.

The activity encouraged teamwork, curiosity, and active participation, making science engaging and meaningful.

## **Objectives:**

- To help students understand the water cycle and its significance in sustaining life.
- To introduce the concept of solute and solvent through simple demonstrations.
- To raise awareness about the importance of water conservation in everyday life.
- To develop scientific thinking, observation, and presentation skills through charts and models.
- To foster collaborative learning and encourage creativity in explaining scientific concepts.

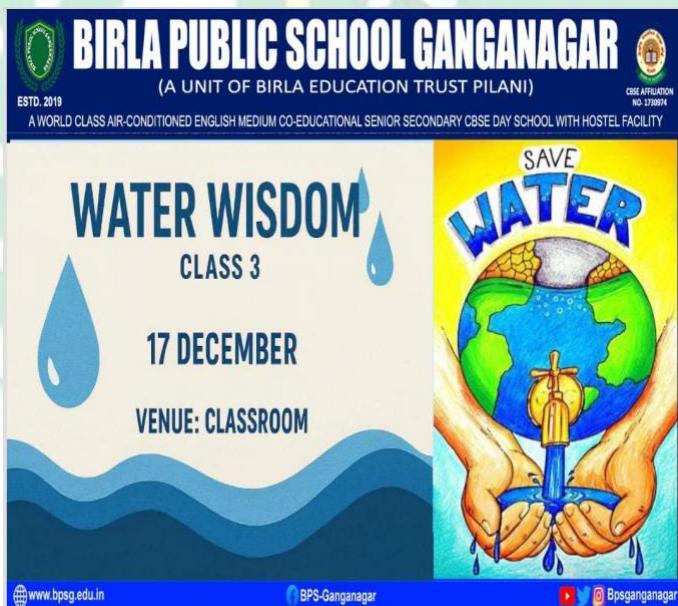

## **Outcome of the Activity:**

- Students gained a clear understanding of the water cycle and solute-solvent relationships.

- Participants demonstrated analytical and reasoning skills by explaining scientific processes with models.
- Learners showed increased awareness of water conservation and its role in maintaining ecological balance.
- The activity boosted confidence, curiosity, and interest in environmental science.
- Students enjoyed experiential learning and improved their presentation skills through charts and models.
