

Session 2025-26

Computer Event Report:

Arti Spectrum (AI Posters & Infographics Event)

Day & Date: Tuesday, 2 December 2025

Class: IX

Event Name: Arti Spectrum – AI Posters and Infographics Design Event

Objective of the Event:

The objective of the event was to help students understand Artificial Intelligence concepts through creative visual representation. The activity aimed to enhance design thinking, creativity, and the ability to communicate information effectively using digital tools.

Event Highlights:

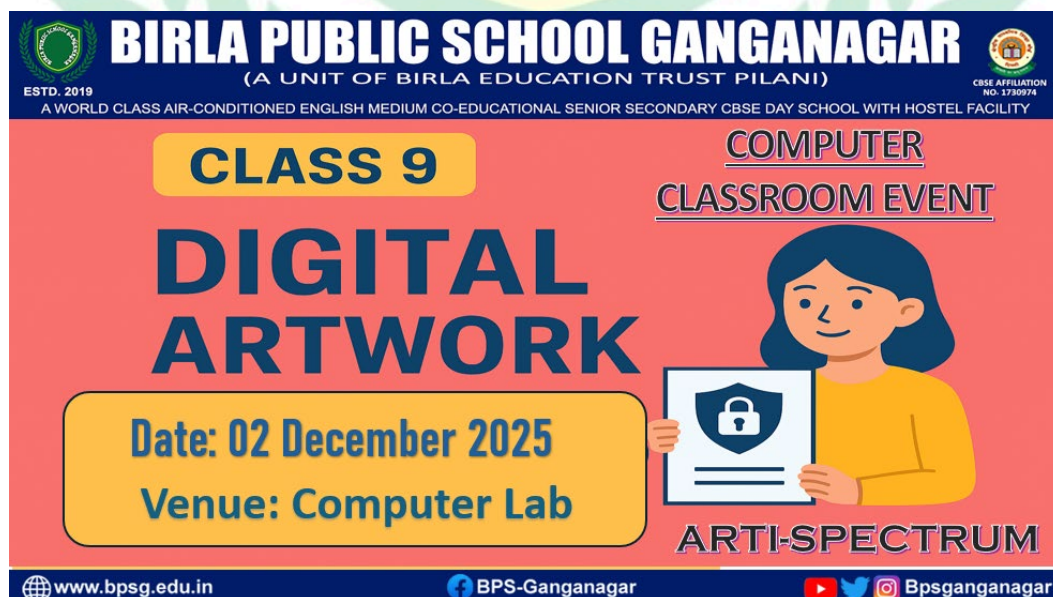

The “Arti Spectrum” AI Posters and Infographics Event was organized successfully for Class IX students. Students designed informative posters and infographics highlighting AI applications, benefits, ethics, and future scope.

Using digital design tools, students combined visuals, icons, text, and data creatively to present AI concepts in an engaging and simplified manner. The activity promoted both technical understanding and artistic expression. Outstanding designs were displayed and appreciated.

Outcome of the Event:

- Students gained conceptual clarity about Artificial Intelligence.
- Creativity and visual communication skills were enhanced.
- Digital design and information presentation skills improved.
- Awareness about ethical and responsible AI usage was developed.
