Session 2025-26

Computer Event Report:
Line Game – The Excel Charts Creation

Day & Date: Tuesday, 2 December 2025
Class: V
Event Name: *Line Game – The Excel Charts Creation Event*
Objective of the Event:

The objective of the event was to introduce students to data handling and visual representation using Microsoft Excel. The activity aimed to strengthen analytical thinking, computer skills, and understanding of how information can be presented effectively through charts.
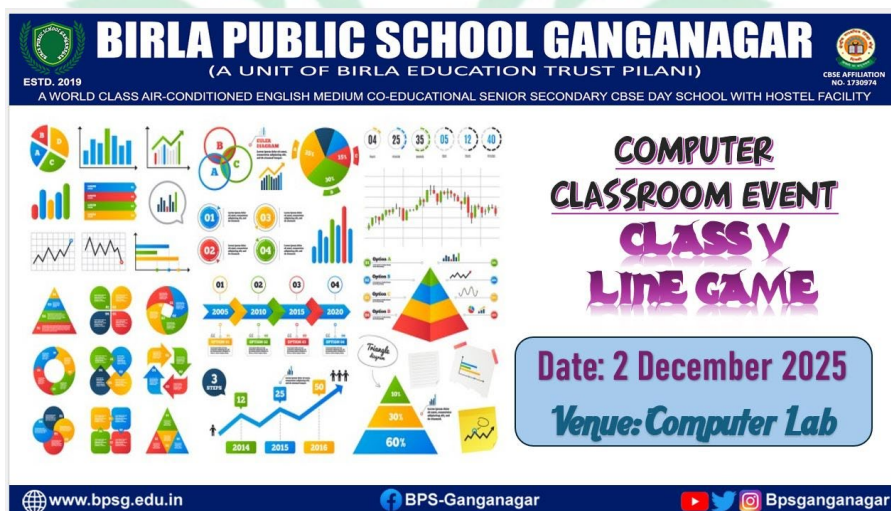

Event Highlights:

The *"Line Game"* Excel Charts Creation Event was conducted successfully for Class V students with active participation. Students learned to enter data, format worksheets, and create different types of charts such as line charts, bar charts, and column charts using Microsoft Excel.

Teachers guided students step-by-step in creating clear and attractive charts. Students enthusiastically experimented with colors, labels, and chart designs to make their work visually appealing. Selected charts were appreciated and showcased, which motivated students to perform better.

Outcome of the Event:
• Students developed data interpretation and analytical skills.
• Hands-on experience with Microsoft Excel and chart creation was gained.
• Creativity and confidence in using digital tools were enhanced.
• Students learned the importance of visual presentation of information.
